

ROLL-AWAY BEDS

Mantua's roll-away beds are designed to be the sturdiest and most comfortable folding beds in the world. These beds are made of strong tubular steel and use our galvanized, wire suspension system for unmatched support and comfort. Each bed includes a 6 inch foam mattress and uses a fastener to hold it in a folded position. The 396 Supra is an excellent choice for commercial applications, as its mattress is covered in an easy-to-clean waterproof material and it includes large, heavy-duty wheels.
